

XTEND

16" Retracting Swing Auger

The Rodono Xtend Retracting Swingaway Hopper replaces the factory swingaway to allow the unloading of trucks of any configuration with out the need for a drive-over pit.

With the Xtend Swinaway Hopper retracted you can drive any truck, B-double or Road Train up beside the auger.

Once the truck is stopped you can easily extend the hopper into position. When the trailer is empty the hopper is retracted to allow the truck to move forward and unload the next trailer.

The Xtend is available as option on 13" and 16" Farm King augers and can be retrofitted to most existing augers.
